

Rolling Call – Facility Submission Schedule (2025–2026)

HOW TO USE THIS SCHEDULE

ReMade@ARI has moved from a cyclical submission process to a **Rolling Call** format for its final TNA Call, which means proposals can be submitted **at any time during the year**. The project will end **31 August 2026** and due to scheduling limitations and instrument availability at our facilities, a staggered submission schedule has been created in order to allow users to make full use of the remaining time available. This schedule provides an overview of the **closing dates** in the [ARIA portal](#) for all our Research Infrastructures. Users should consult this schedule before submission in order to ensure their chosen facility is still open. Users are also strongly encouraged to **apply early**, as facilities may close once their time is fully allocated.

NOTE: Some instruments at some facilities may not be available until the closing date indicated below. Please consult our [Technique Catalogue](#) for more information on availability of specific instruments.

IMPORTANT DATES

- **1 Sept 2025** - TNA Rolling Call Opens
- **15 May 2026** - Pre-proposal Call closes
- **29 May 2026** - TNA Rolling Call closes
- **15 June 2026** - All projects scheduled
- **31 Jul 2026** - All projects completed, and experimental reports submitted
- **31 Aug 2026** - All reporting in ARIA portal and reimbursement requests submitted
